The Art & Science of Your Perfect Garage Door

Art & Science

At Midland Garage Door Manufacturing Company, we take pride in our workmanship and attention to detail. Since 1978, we have been dedicated to combining art and science to build the longest-lasting, smoothest-running garage doors possible. With nearly 40 years of experience building doors for homes, farms and commercial buildings, our skilled employees remain dedicated to providing you the highest quality garage doors imaginable.

The Art of Customer Service

When you work with us, you become part of the family. Our extended family includes dealers selected based on their commitment to exceptional service, and delivery drivers our dealers know by name. Our skilled shipping specialists carefully load your door by hand so it's never touched by a forklift, virtually eliminating damage during shipping.

From initial inquiries to orders, our team of customer service professionals work closely with your dealer to ensure you get the best door for your needs.

The Science of Quality

We produce each door in the Midwest using time-tested manufacturing methods. We have a drive to build a door with the quality and value we would expect for our own homes. We focus on precision manufacturing so your door will work perfectly for years to come.

The Art of Craftsmanship

We offer a vast number of combinations of designs, colors and window options so your home is one of a kind, just like you. We do not just build garage doors; we create lasting and functional art that will enhance the appearance of your home.

The Science of Durability

More than form and function, each of our doors is built to last through years of use in the harshest weather. North Dakota winters are legendary, as are the year-round winds. Not only homeowners, but also farmers and commercial customers depend on Midland's strength and durability to stand up to the elements.

We build the strongest commercial doors in the industry. That construction knowledge translates to our residential lines, ensuring better and stronger doors for your home that will last for years to come.

Thank you for choosing a Midland Garage Door!

Premium

The Best Door for your Home

Midland's reputation for eye-catching design and quality is reflected in our Thermo-Steel doors, which also provide durability you won't find in any other garage door. Like all of our doors, we design and build them in North Dakota to withstand weather extremes and provide years of trouble-free operation.

All Midland Thermo-Steel doors are built with rugged 25-gauge pebble-grain texture steel on the front and back, as well as heavy-duty galvanized track and hardware. On the bottom, a commercial-grade astragal weather seal with an aluminum retainer keeps the cold at bay. And with several unique styles from which to choose, you can make sure your home stands out from the rest. This quality is available in our Raised Steel Panel, Carriage Panel, Long Panel Carriage, Ranch Panel, Classic Panel and Flush designs.

Add the classic look of wood to the durability and weather resistance of Thermo-Steel with light or dark Directional Oak color options. Or, choose from any of Midland's classic colors.

Premium

Thermo-Steel Designs

The beautiful and durable Thermo-Steel line gives you a multitude of style options that are sure to fit your home. And, the industry-leading thermal efficiency will keep the elements out.

Raised Steel Panel

The Raised Panel Steel garage door remains the most popular design for homeowners. Its sculpted panels fit nearly any home design, ensuring a lasting and timeless look. Its strength and beauty will last for years to come.

Ranch Panel

This time-honored design uses simple lines for a big statement. The Ranch Panel features longer panels for a clean, classic look on any home. The simplification of the lines makes for a bigger, bolder statement in a door and complements a variety of home designs.

Carriage Panel

Add a touch of elegance and historical charm to any home with the Carriage Panel design. The timeless "rail and stile" design blends beautifully with many home styles. The Carriage Panel design especially stands out in the Directional Oak colors. Adding decorative hardware further enhances the distinctive, timeless design.

Long Panel Carriage

The long-panel version of Midland's Carriage Panel door adds a fresh dimension to the time-honored classic. By removing the center stile, you're left with a cleaner, more contemporary look that still offers a historical feel. Stretch the boundaries of design by choosing from decorative hardware options to add a classic look.

Classic Panel Carriage

This design consists of small vertical panels for a touch of colonial charm. Make it your own by choosing from a variety of colors or adding decorative hardware.

Flush Panel

The minimalist design of our Flush Panel doors gives a modern feel to any home. Interrupt the smooth-panel front with unique window choices or select from fresh color options for an exceptional addition to any new home.

* All designs also available in Series 24 doors.

Thermo-Steel Overlays

Our Overlay doors start with a strong, 2-inch Flush Panel Thermo-Steel door base. Each option uses state-of-the-art weather-resistant wood composite Smart Trim® boards to create a distinguished and durable garage door. Although we offer many standard designs, we will custom build your own design, leaving the creativity in your hands. This gives you the opportunity to choose not only the pattern design, but windows, hardware and color, as well. With two different overlay styles and endless design options, there are nearly infinite possibilities to make your door unique.

Smooth Overlay

Get the classic look of real wood with the strength and energy efficiency of a steel door. Our Smooth Overlay series features Smart Trim® and wood grain boards in light and dark directional oak patterns for a warm, inviting look. Without any pebble grain steel showing, it'll appear as a solid oak door, yet it's backed by the top-of-the-line quality and durability of our Thermo-Steel line.

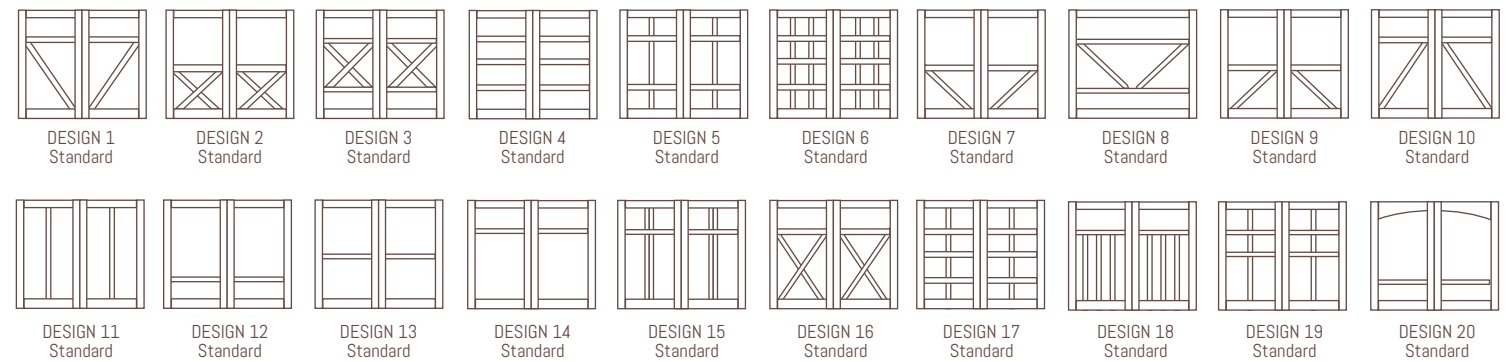

2-Inch V-Groove Overlay

Characteristic charm radiates off of the V-Groove Overlay series. Each door is hand built with precision by our skilled team. The Smart Trim® and V-Groove overlay boards are primed and painted for a complete overlay of the steel front. The V-Groove Overlay comes in 20 standard design options, or you can design your own and our team will make it a reality. You can opt for any of the six standard colors we offer, or request your door to be primed for you to paint the color of your choice.

2-Inch Steel Overlay

Simple yet brilliant — this overlay's polished style is sure to be a showstopper for years to come. This design leaves some of the Flush Panel steel visible while accenting the door with an overlaid design. Choose from 20 different standard designs or, for the ultimate in custom design, draw your own. We offer seven underlay door colors and six overlay color options. You also can order the door with the overlay primed to paint the perfect color to match your home.

Performance

Series 24

Midland's Series 24 2-inch residential door is available in the same great style options offered in our Thermo-Steel line (pictured on previous page): Raised Steel Panel, Ranch Panel, Carriage Panel, Long Panel Carriage, Classic Panel or Flush Steel Panel. This simple, maintenance-free option comes in durable 24-gauge steel and can be insulated for added weather protection.

TS-138 Thermo-Steel

Our entry-level Thermo-Steel door is beautiful, durable and affordable. This residential 1-3/8-inch steel garage door is manufactured like its 2-inch siblings in the line and provides a more affordable option for those seeking Midland quality. The TS-138 door, which is available in a Raised Steel Panel design, will provide beauty and durability for years to come.

Essential

Valucraft Plus

The Plus in Valucraft means you get everything that our Valucraft Raised Steel Panel garage door offers PLUS more. This Raised Steel Panel door provides you with similar benefits to the Valucraft — and then some. Valucraft Plus doors incorporate a heavy-duty commercial rubber bottom weather seal with an aluminum retainer, heavier hinges and a longer-life spring.

Valucraft

The Raised Steel Panel garage door pattern has become an American standard. Available in six colors, the Valucraft series offers a great choice for an economically-priced patterned door. Whether it's for a home, apartments or storage units, the Valucraft series stands up to the task. Valucraft doors also can be insulated, if needed.

Series 26

A simple, two-inch ribbed door rolled from 26-gauge pebble-textured steel, the Series 26 door (pictured below) offers an affordably-priced, reliable option for homes, apartments or storage units. Insulation can be added, if needed.

Essential

If you're interested in adding luxury and reliability to your home, consider Midland Garage Doors. We've provided our customers with exquisite, customized garage doors since 1978, and we look forward to doing the same for you.
